

## Personal Profile

I'm a curious individual who likes to know how and why things work. I read widely in my free time and am currently reading introductory books to philosophy. I also love engaging in problem solving activities.

## Skill Set

- Rhinoceros 3D
- Keyshot
- Photoshop
- Illustrator
- 3D Printing
- Lasercutting
- Woodworking

## Projects and Competitions

### NTU Academic Building South Bus Stop Design Competition

#### 1st Runner Up

2019

Designed a Bus Stop for the new MET building for NTU. Pritzker Award Winning, Toyo Ito's firm was on the judging panel.

### JID Masterplan Exhibiton

#### Team Member

2019

Followed up with JTC on expanding on a previous project done with Mistletoe, providing assets for an AR experience exhibited at Westgate. The project involved designing elements of an innovator's village at Jurong Eco Garden

### NTU-TUM GlobalDrive

#### Singapore Team Leader

2018 - 2019

Involved with the conceptualisation, design and prototyping of the interior of an autonomous concept car. Liaised with the team from the Technological University of Munich and coordinated local side meetings. Managed the Singapore side project timeline.

### IKEA Young Designer Award Clean Energy Challenge

#### Top-10 Finalist

2018

Along with two other teammates, conceptualised, designed and made a prototype a simple energy-saving method of keeping cool in Singapore.
